## 4. Section 4: First aid measures

## 4.1 Description of first aid measures

When providing first aid it is necessary to ensure safety of both victim and person rescuing. It is necessary to avoid chaotic behavior. Victim must be kept in mental and physical rest. Victim must be kept warm and must not get chilled. Take original container with label or safety data sheet with information about substance or mixture with you in case of medical examination.

Inhalation: Break exposure, move to fresh air protecting the victim from cold. Provide medical treatment especially if coughing, shortness of breath or other symptoms persist.

When on skin: Put away contaminated clothes and shoes, wash the contaminated spot with plenty of tepid water; if the skin is not irritated, soap can be used; seek doctor's advice, especially if the skin stays irritated.

Eye Contact: Rinse eyes with plenty of water (10 to 15 min). Keep eyes open (even by force if necessary). If the victim is wearing contact lenses remove them immediately. Seek medical attention.

Ingestion: Do not induce vomiting! Drink at least 0.5 liters of water with 5 to 10 tablets of crushed charcoal. In case of nausea contact the Toxicology Information Centre for need of medical treatment with information about composition of the mixture from the original container or SDS.

- 4.2 Most important symptoms and effects, both acute and delayed
- The product may have adverse effects through inhalation and if swallowed. It can irritate skin, mucous membranes and eyes.
- 4.3 Indication of any immediate medical attention and special treatment needed:

#### 5. Section 5: Fire-fighting measures

5.1 Extinguishing media

Suitable extinguishing media: The product is not inflammable. Water spray (water mist), foam, carbon dioxide, dry powder. Unsuitable extinguishing media: The strong water current. It can be spread fire.

5.2 Specific danger linked to the substance or mixture: Carbon monoxide and dioxide and carbon black can be produced while burning.

5.3 Advice for firefighters: wear a breathing apparatus and protective clothing.

### 6. Section 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures: Appropriate protective gloves, goggles, appropriate clothing, or respirator.

6.1.1 For workers except for those intervening in emergency cases - instructions in case of accidental spill and leak of substance or mixture:
 a) use of appropriate protection (including personal protective equipment according to part 8 BL), in order to avoid any skin, eyes or personal clothing contamination;

b) removing possible sources of ignition, providing proper ventilation, control of dust - not relevant

c) emergency measures, for example necessary evacuation from dangerous area or consultation with an expert - not relevant

6.1.2 For workers intervening in emergency cases - instructions for appropriate materials of personal protective suits (see part 8 BL)

- 6.2 Environmental precautions: Prevent environmental pollution leakage into drains, surface water, groundwater or soil.
- 6.3 Methods and materials for limitation of leaks and for cleaning:
- 6.3.1 Instructions for leak limitation of spilled substance or mixture
  - a) enclose the spilled mixture, cover the canalization;

b) seal the damaged package

6.3.2 Instructions for removal of spilled substance or mixtu
--

Absorb with appropriate agent, hand over to authorized person for disposal.

6.4 Reference to other sections: See also section 7., 8 and 13.

#### 7. Section 7: Handling and storage

#### 7.1 Measures for safe manipulation:

7.1.1 Recomendations:

a) Workers handeling the product have to get familiar with health and safety rules for work and have to obey these rules. Secure escape routs (enclosing of leaked mixture, sealing of demaged packages and so on), for fire prevention (remove ignition sources, non-sparkling tools and so on) andlimit the production of aerosol and dust.

b) Obey measures for prevention of manipulation with incompatible substances or mixtures (see part 10) in common areas.

c) Store in original closed packages in temperature from +5 to +25 °C, do not expose to temperature under 0 °C (not even in short term). Do not expose to direct sunlight or other heat sources.

d) Prevent the contamination of environment, i.e. leak into canalization, surface or underground water and soil.

7.1.2 Instructions for general hygiene of work:

a) Do not eat, drink or smoke on work areas.

b) After working with product wash your hands with soap and water, eventualy use regeneration hand cream.

c) Before entering dining areas, remove contaminated clothing and protective equipment.

- 7.2 Conditions for safe storage of substances and mixtures including incompatible substances and mixtures: Store in dry and well-ventilated storages in original closed packages in temperatures from +5 to +25 °C, do not expose to temperature under 0 °C (not even in short term). Do not expose to direct sunlight or other heat sources. Prevent any contact with oxidazing substances, strong acids and bases. Do not store with food, drinks and feed. The product is not a flamable liquid according to ČSN 65 0201.
- 7.3 Specific end use: see part 1.2; coating procedure and recomendations are listed in technical list of the product, or in other product documentation.

#### 8. Section 8: Exposure controls / personal protection

8.1 Control parameters:

Exposure limits EH40/2005 (WELs):

8.2 Exposure controls

Ensure adequate ventilation. Ensure protective equipment is worn while working with the product. Contaminated work clothes can be reused after thorough cleaning. Wash your hands and face with soap and water after use. Do not eat, drink or smoke while working with the product.

Not Assigned

- 8.2.1 Appropriate engineering controls: Observe the usual precautions to protect the health and well-ventilated.
- 8.2.2 Individual protection measures, such as personal protective equipment:

Occupational exposure is governed by Directive 89/686/EEC therefore any use of personal protective equipment must be in accordance with this Regulation.

a) Eyes and face protection: Suitable safety goggles (EN 166), face shiled.

b) Skin protection: Common safety clothing with long sleave and shoes; take of the contaminated clothing and wash your skin with soap and water.

b-1) Hands protection: suitable protective gloves (made from rubber - according to EN 374), wash your hands with soap and water after work, c) Airways protection: with proper area ventilation not required. When spraying, face half-shiled is recommended for gass filtration (EN 405) or quarter-shiled with gass filter (EN 140, EN 141).

d) Heat hazard: Special attention must be paid to construction of personal protective measures, when specifying protective measures for protection against materials, which are considered to be heat hazard. Not relevant for this product.

8.2.3 Environmental exposure controls: Avoid infiltration of surface and groundwater and soil.

9. Section 9: Physical and chemical properties 9.1. Information on basic physical and chemical properties viscous liquid a) State milky white b) Color characteristic of acrylic dispersion c) Odour: Not specified Odor threshold: approximately 0 d) Melting/Freezing point (temperature range) (°C): approximately 100 e) Boiling point or initial boiling point and boiling range (°C) non-flammable liquid f) Combustibility: Not specified g) Explosion limints: upper limit (% volume): lower limit (% volume): Not specified Not specified h) Point of ignition: Not specified i) Temperature of self-ignition: j) Temperature of decomposition (°C): Not specified 7.5 - 9.5 k) pH (23 °C) Not specified I) Kinematic viscosity: m) Solubility (23 °C) unlimited miscibility - with water: Not specified - with fats. Not specified n) Partition coefficient n - octanol/water:

	o) Steam pressure (20 °C):	2,3 kPa			
	p) Density and/or relative density (20 °C):	approximately 1,10 g.cm <sup>-3</sup>			
	q) Relative viscosity of steam (at °C):	Not specified			
	r) Particles characteristics:	Not specified			
.2	Other information:				
.2.1	Information about class of physical hazard:	is not relevant			
.2.2	Other safety characteristics				
	Evaporation rate:	Not specified			
	Dynamic viscosity:	Not specified			
	Explosive properties:	Not specified			
	Oxidizing properties:	Not specified			
	VOC (g/L):	88,5			
0.	Section 10: Stability and reactivity				
	Product is stable under recommended storage and handling conditions.				
0.1	Reactivity: Product is not reactive under recommended storage and hand	ing conditions.			
0.2					
0.3	Possibility of hazardous reactions: In case of contact with substances reactions	cting dangerously with water.			
0.4	Conditions to avoid: Temperatures below 0 °C and above 100 °C cause degradation of the product. Temperatures above recommended storag temperature reduce life of the product.				
0.5	Incompatible materials: Substances reacting with water.				
0.6	Hazardous Decomposition Products: Carbon monoxide and dioxide and c	arbon black may form during burning.

Substances in the mixture can react with each other inside of a body and can cause different levels of absorption, metabolism and secretion.
 It is necessary to consider, if concentration of each substance is sufficient to contribute mixture's effects on health. For each substance a) if the information are doubled, they are listed only once for a substance as a whole, for example when two different substances are

causing vomiting and diarrhea;

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture.

Regulation of the European Parliament and Council Regulation (EC) No 1907/2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals establishing a European Chemicals Agency, as amended

Regulation of the European Parliament and Council Regulation (EC) No 1272/2008 (CLP) as amended Commision directive (EU) No. 878/2020 EH40/2005 Workplace exposure limits (second edition, published 2011). Containing the list of workplace exposure limits for use with the Control of Substances Hazardous to Health Regulations (as amended) Assessment chemical safety of mixture: Were not performed

# 16

Section 16: Other informations

Information stated in this safety data sheet is based on the current knowledge of EU legislation. It is recommendation in terms of health and safety as well as recommendation related to ecological matters that are essential to safe usage of the product.

a) New edition.

15.2

b) key or legend for abbreviations and accronyms used in the safety data sheet:

- LD<sub>50</sub> The lethal dose for 50 % mortality of the test population relative to a control sample.
- LC<sub>50</sub> Lethal concentration for 50 % mortality of the test population relative to a control sample.
- EC<sub>50</sub> Effective concentration for 50 % mortality of the test population relative to a control sample.
- Effective concentration for 10 % mortality of the test population relative to a control sample. EC<sub>10</sub>
- Inhibitory concentration to reduce the growth or growth rate of 50% of the test population relative to a control sample.  $IC_{50}$
- LL<sub>50</sub> Lethal loading doses of test substance resulting in 50% mortality
- EL<sub>50</sub> Effective loading doses of test substance resulting in 50% mortality
- PBT Persistent, bioaccumulative and toxic substances.
- vPvB Very persistent and very bioaccumulative substances.
- DNEL Derived No Effect Level - derived concentration of the substance without adverse effects
- DMEL Derived Minimum Effect Level - derived minimum level at which the adverse effects
- NOAEL No Observed Adverse Effect Level - no negative effect was observed
- PNFC Predicted No Effect Concentration - an estimate of the concentration of the substance without adverse effects
- NOFI R No Observed Effect Loading Rate - dosage rate without observed effect
- NOEC No Observed Effect Concentration - concentration without observed effect
- NOFI No Observed Effect Level - level without observed effect
- LOEC Lowest Observed Effect Concentration - lowest concentrations with observable effects
- ADR European Agreement concerning the international carriage of dangerous goods by road.
- RID Regulations concerning the international carriage of dangerous goods by rail.
- IMDG International maritime code of dangerous goods.
- ICAO The International Civil Aviation Organization.
- ΙΑΤΑ International Air Transport Association.
- GHS Globally Harmonized System of Classification and Labelling of Chemical substances.

c) important references to literature and data sources

Initial data sources are safety data sheets of the inherent (components).

d) in case of mixture, statement about evaluation method used for classification according to article 9 of directive (ES) number 1272/2008

For evaluation purposes, principles of extrapolation were used. Calculation methods.

e) List of H-sentences, whose full form is not listed in other parts.

H301	Toxic if swallowed.
H310	Fatal in contact with skin.
H314	Causes severe skin burns and eye damage.
H315	Causes skin irritation.
H317	May cause an allergic skin reaction.
H318	Causes serious eye damage.
H319	Causes serious eye irritation.
H330	Fatal if inhaled.
H400	Very toxic to aquatic life.
H410	Very toxic to aquatic life with long lasting effects.

Guidelines for training:

As required by national legislation.

Recommended restrictions on use (i. e. non-statutory recommendations by supplier):

Product should not be used for other purposes than specified (see section 1.2). Because specific conditions of use are beyond supplier's control it is responsibility of the user to adapt notifications to local law and regulations. Safety information describe the product with regard to safety and can not be considered technical information about the product.
