It can be sprea Specific danger linked to the substance or mixture: Carbon monoxide and Advice for firefighters: wear a breathing apparatus and protective clothing	d fire. I dioxide and carbon black can be pro	
6.	Section 6: Accidental release measures		
6.1	Personal precautions, protective equipment and emergency procedures: respirator.		
6.1.1	For workers except for those intervening in emergency cases - instruction a) use of appropriate protection (including personal protective equipment clothing contamination; b) removing possible sources of ignition, providing proper ventilation, con	according to part 8 BL), in order to av trol of dust - not relevant	void any skin, eyes or personal
6.1.2 6.2	 c) emergency measures, for example necessary evacuation from dangered For workers intervening in emergency cases - instructions for appropriate Environmental precautions: Prevent environmental pollution - leakage intervented 	materials of personal protective suits	s (see part 8 BL)
6.3	Methods and materials for limitation of leaks and for cleaning:		
6.3.1	Instructions for leak limitation of spilled substance or mixture		

SDS 14/2024

a) enclose the spilled mixture, cover the canalization;

b) seal the damaged package

- 6.3.2 Instructions for removal of spilled substance or mixture
- Absorb with appropriate agent, hand over to authorized person for disposal.
- 6.4 Reference to other sections: See also section 7., 8 and 13.

7. Section 7: Handling and storage

7.1 Measures for safe manipulation:

7.1.1 Recomendations:

a) Workers handeling the product have to get familiar with health and safety rules for work and have to obey these rules. Secure escape routs (enclosing of leaked mixture, sealing of demaged packages and so on), for fire prevention (remove ignition sources, non-sparkling tools and so on) and limit the production of aerosol and dust.

b) Obey measures for prevention of manipulation with incompatible substances or mixtures (see part 10) in common areas.

c) Store in original closed packages in temperature from +5 to +25 °C, do not expose to temperature under 0 °C (not even in short term). Do not expose to direct sunlight or other heat sources.

d) Prevent the contamination of environment, i.e. leak into canalization, surface or underground water and soil.

7.1.2 Instructions for general hygiene of work:

a) Do not eat, drink or smoke on work areas.

- b) After working with product wash your hands with soap and water, eventualy use regeneration hand cream.
- c) Before entering dining areas, remove contaminated clothing and protective equipment.
- 7.2 Conditions for safe storage of substances and mixtures including incompatible substances and mixtures: Store in dry and well-ventilated storages in original closed packages in temperatures from +5 to +25 °C, do not expose to temperature under 0 °C (not even in short term). Do not expose to direct sunlight or other heat sources. Prevent any contact with oxidazing substances, strong acids and bases. Do not store with food, drinks and feed. The product is not a flamable liquid according to ČSN 65 0201.
- 7.3 Specific end use: see part 1.2; coating procedure and recomendations are listed in technical list of the product, or in other product documentation.

8. Section 8: Exposure controls / personal protection

8.1 Control parameters:

Exposure limits EH40/2005 (WELs):

Not Assigned

8.2 Exposure controls

Ensure adequate ventilation. Ensure protective equipment is worn while working with the product. Contaminated work clothes can be reused after thorough cleaning. Wash your hands and face with soap and water after use. Do not eat, drink or smoke while working with the product.

- 8.2.1 Appropriate engineering controls: Observe the usual precautions to protect the health and well-ventilated.
- 8.2.2 Individual protection measures, such as personal protective equipment:

Occupational exposure is governed by Directive 89/686/EEC therefore any use of personal protective equipment must be in accordance with this Regulation.

a) Eyes and face protection: Suitable safety goggles (EN 166), face shiled.

b) Skin protection: Common safety clothing with long sleave and shoes; take of the contaminated clothing and wash your skin with soap and water.

b-1) Hands protection: suitable protective gloves (made from rubber - according to EN 374), wash your hands with soap and water after work, c) Airways protection: with proper area ventilation not required. When spraying, face half-shiled is recommended for gass filtration (EN 405) or quarter-shiled with gass filter (EN 140, EN 141).

d) Heat hazard: Special attention must be paid to construction of personal protective measures, when specifying protective measures for protection against materials, which are considered to be heat hazard. Not relevant for this product.

8.2.3 Environmental exposure controls: Avoid infiltration of surface and groundwater and soil.

9. Section 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

a) State
b) Color
c) Odour:
Odor threshold:
d) Melting/Freezing point (temperature range) (°C):
e) Boiling point or initial boiling point and boiling range (°C)
f) Combustibility:
g) Explosion limints: upper limit (% volume):
lower limit (% volume):

h) Point of ignition:

i) Temperature of self-ignition:

j) Temperature of decomposition (°C):

k) pH (23 °C)

I) Kinematic viscosity:

m) Solubility (23 °C)

- with water:

10.	Section 10: Stability and reactivity	
10.	Product is stable under recommended storage and handling conditions.	
10.1	Reactivity: Product is not reactive under recommended storage and hand	ling conditions
		-
10.2	Chemical stability: Product is stable under recommended storage and har	-
10.3	Possibility of hazardous reactions: In case of contact with substances rea	
10.4	Conditions to avoid: Temperatures below 0 $^\circ\text{C}$ and above 100 $^\circ\text{C}$ cause d temperature reduce life of the product.	egradation of the product. Temperatures above recommended storage
10.5	Incompatible materials: Substances reacting with water.	
10.6	Hazardous Decomposition Products: Carbon monoxide and dioxide and c	arbon black may form during burning.
11.	Section 11: Toxicological information	
11.1	Information about hazard classes acording to (ES) č. 1272/2008	
	a) acute toxicity:	the classification cirteria are not met based on avilable information
	- LD ₅₀ , oral, rat (mg.kg ⁻¹):	the classification cirteria are not met based on avilable information
	- LD ₅₀ , dermal, rat or rabbit (mg.kg ⁻¹):	the classification cirteria are not met based on avilable information
	- LC ₅₀ , inhalation, rat, for aerosols or particles (mg.kg ⁻¹):	the classification cirteria are not met based on avilable information
	- LC ₅₀ , inhalation, rat, for gases and vapours (mg.kg ⁻¹):	the classification cirteria are not met based on avilable information
	b) corrosivity/skin irritation:	the classification cirteria are not met based on avilable information
	c) serious eye damage / eyes irritation:	the classification cirteria are not met based on avilable information
	d) sensitivity of airways / sensitivity of skin:	the classification cirteria are not met based on avilable information
	e) germ cells mutagenicity:	the classification cirteria are not met based on avilable information
	f) carcinogenicity:	the classification cirteria are not met based on avilable information
	g) toxicity for reproduction:	the classification cirteria are not met based on avilable information
	h) toxicity for specific organs - single exposure:	the classification cirteria are not met based on avilable information
	i) toxicity for specific organs - multiple exposures:	the classification cirteria are not met based on avilable information
	j) hazards while inhaled: Human experience:	the classification cirteria are not met based on avilable information No detrimental effects were found upon compliance with the
1	Tests on onimals:	prescribed safety measures.
	Tests on animals:	Were not performed
	Information for each hazard class or breakdown:	see above
11.1.2	Toxicological properties of mixture	not avilable
11.1.3	If enough information from substance/mixture trials exist, it might be necessary to sum up results of used studies, for example according to exposure run	not relevant
11.1.4	If the classification criteria are not met for specific hazard class, information explaining the justification should be stated.	relevant concentration limits were not exceeded
11.1.5	Information about likely exposure run	no effects on human health are known
	Symptoms corresponding to physical, chemical and toxicological features	no effects on human health are known
11.1.7	Belated and immediate effects and chronical effects of short/long term exposure	no effects on human health are known
11 1 8	Interactive effects	unknown
	Lack of specific data	not relevant
	(Mixtures	
		see part 8
[11.1.1]	⁴ Mixtures information compared to substance information	ad oop oou oo different lought of the switch we state the Base and the state

Substances in the mixture can react with each other inside of a body and can cause different levels of absorption, metabolism and secretion.
 It is necessary to consider, if concentration of each substance is sufficient to contribute mixture's effects on health. For each substance

	a) if the information are doubled, they are listed only once for a substance as a whole, for example when two different substances are causing vomiting and diarrhea;	Not relevant for this mixture.
	b) if it is not likely the effects will appear with current concentrations, for example when weak irritating substance is disolved in non-irritating solution to a level under certain concentration;	Not relevant for this mixture.
	c) if the information about mutual effects of substances in the mixture are unavilable, no assumptions will be listed and instead effects on healtf of each substance will be listed.	see part 8
1.1.12	Other information	None
1.2	Other hazards information	
1.2.1	Features causing disruption of endocrinal systém	Not relevant for this mixture.
1.2.2	Additional data:	None
2.	Section 12: Ecological information	
2.1	Toxicity	
	Acute toxicity for water organisms:	
	- LC ₅₀ , 96 hours, fish (mg/kg):	Not set
	- LC ₅₀ , 48 hours, fish (mg/kg):	Not set
	- IC ₅₀ , 72 hours, algae (mg/kg):	Not set
2.2	Persistence and degradability:	Not set
	Bioaccumulative potential:	Not set
	Mobility in soil:	It was not determined, the blend is miscible with water.
	Results of PBT and vPvB	The mixture does not meet the criteria for classification as PBT or vPvB.
12.6	Features causing disruption of endocrinal systém	Unknown for this mixture
12.7	Other adverse effects:	See Section 2
	Additional data:	The product must not leak to surface and groundwater. Notify
	Section 13: Disposal considerations Methods of waste management: (a) Appropriate methods of disposal of the substance or mixture and conta Waste Act (as amended) and the applicable Waste Disposal Regulations packaging in marked waste collection containers and hand it over for disp authorised to do so. 	Notes:	None			
	Additiona	al data: None			
5.	Section	15: Regulatory information			
5.1	Safety, health and environmental regulations/legislation specific for the substance or mixture.				
	Regulatio	Regulation of the European Parliament and Council Regulation (EC) No 1907/2006 concerning the Registration, Evaluation, Authorisation and			
		on of Chemicals establishing a European Chemicals Agency, as amended			
	Regulation of the European Parliament and Council Regulation (EC) No 1272/2008 (CLP) as amended				
	Commision directive (EU) No. 878/2020				
		05 Workplace exposure limits (second edition, published 2011). Containing the list of workplace exposure limits for use with the Cont ances Hazardous to Health Regulations (as amended)			
5.2		ent chemical safety of mixture: Were not performed			
6.	Section 16: Other informations				
	Information stated in this safety data sheet is based on the current knowledge of EU legislation. It is recommendation in terms of health and safety as well as recommendation related to ecological matters that are essential to safe usage of the product.				
	a) New e	dition.			
	b) key or	legend for abbreviations and accronyms used in the safety data sheet:			
	LD ₅₀	The lethal dose for 50 % mortality of the test population relative to a control sample.			
	LC ₅₀	Lethal concentration for 50 % mortality of the test population relative to a control sample.			
	EC ₅₀	Effective concentration for 50 % mortality of the test population relative to a control sample.			
	EC ₁₀	Effective concentration for 10 % mortality of the test population relative to a control sample.			
	IC ₅₀	Inhibitory concentration to reduce the growth or growth rate of 50% of the test population relative to a control sample.			
	LL_{50}	Lethal loading doses of test substance resulting in 50% mortality			
	EL ₅₀	Effective loading doses of test substance resulting in 50% mortality			
	PBT	Persistent, bioaccumulative and toxic substances.			
	vPvB	Very persistent and very bioaccumulative substances.			
	DNEL	Derived No Effect Level - derived concentration of the substance without adverse effects			
	DMEL	Derived Minimum Effect Level - derived minimum level at which the adverse effects			
	NOAEL	No Observed Adverse Effect Level - no negative effect was observed			
	PNEC	Predicted No Effect Concentration - an estimate of the concentration of the substance without adverse effects			
	NOELR	No Observed Effect Loading Rate - dosage rate without observed effect			
	NOEC	No Observed Effect Concentration - concentration without observed effect			
	NOEL	No Observed Effect Level - level without observed effect			
	LOEC	Lowest Observed Effect Concentration - lowest concentrations with observable effects			
	ADR	European Agreement concerning the international carriage of dangerous goods by road.			
	RID	Regulations concerning the international carriage of dangerous goods by rail.			
	IMDG	International maritime code of dangerous goods.			
	ICAO	The International Civil Aviation Organization.			
	IATA	International Air Transport Association.			
	GHS	Globally Harmonized System of Classification and Labelling of Chemical substances.			
	c) important references to literature and data sources				
	c) important references to literature and data sources Initial data sources are safety data sheets of the inherent (components).				
	d) in case of mixture, statement about evaluation method used for classification according to article 9 of directive (ES) number 1272/2008				
	For evaluation purposes, principles of extrapolation were used. Calculation methods.				
	,	H-sentences, whose full form is not listed in other parts.			
	H301	Toxic if swallowed.			
	H310	Fatal in contact with skin.			
	H314	Causes severe skin burns and eye damage.			
	H315	Causes skin irritation.			
	H317	May cause an allergic skin reaction.			
	H318	Causes serious eye damage.			
	H319	Causes serious eye irritation.			
	H330	Fatal if inhaled.			
	H400	Very toxic to aquatic life.			
	H410	Very toxic to aquatic life with long lasting effects.			
	EUH071	Causes burns to the respiratory tract			

EUH071 Causes burns to the respiratory tract.

Guidelines for training: As required by national legislation.

Recommended restrictions on use (i. e. non-statutory recommendations by supplier):

Product should not be used for other purposes than specified (see section 1.2). Because specific conditions of use are beyond supplier's control it is responsibility of the user to adapt notifications to local law and regulations. Safety information describe the product with regard to safety and can not be considered technical information about the product.
