4.	Section 4: First aid measures			
4 .1	Description of first aid measures			
	When providing first aid it is necessary to ensure safety of both victim and person rescuing. It is necessary to avoid chaotic behavior. Victim must be kept in mental and physical rest. Victim must be kept warm and must not get chilled. Take original container with label or safety data sheet with information about substance or mixture with you in case of medical examination.			
	Inhalation: Break exposure, move to fresh air protecting the victim from cold. Provide medical treatment especially if coughing, shortness of breath or other symptoms persist.			
	When on skin: Put away contaminated clothes and shoes, wash the contaminated spot with plenty of tepid water; if the skin is not irritated, soap can be used; seek doctor's advice, especially if the skin stays irritated.			
	Eye Contact: Rinse eyes with plenty of water (10 to 15 min). Keep eyes open (even by force if necessary). If the victim is wearing contact lenses remove them immediately. Seek medical attention.			
	Ingestion: Do not induce vomiting! Drink at least 0.5 liters of water with 5 to 10 tablets of crushed charcoal. In case of nausea contact the Toxicology Information Centre for need of medical treatment with information about composition of the mixture from the original container or SDS.			
4.2	Most important symptoms and effects, both acute and delayed The product may have adverse effects through inhalation and if swallowed. It can irritate skin, mucous membranes and eyes.			
4.3	Indication of any immediate medical attention and special treatment n	eeded:	Symptomatic treatment	

5.	Section 5: Fire-fighting measures			
5.1	1 Extinguishing media			
	Suitable extinguishing media: The product is not inflammable. Water spray (water mist), foam, carbon dioxide, dry powder.			
	Unsuitable extinguishing media: The strong water current. It can be spre			
5.2	5.2 Specific danger linked to the substance or mixture: Upon evaporation of the liquid element the residue burns and emits a thick blac smoke (CO, CO ₂ , soot). Inhaling products during decomposition may endanger life.			
5.3 Advice for firefighters: wear a breathing apparatus and protective clothing.				
6.	Section 6: Accidental release measures			
6.1	Personal precautions, protective equipment and emergency procedures: respirator.	Appropriate protective gloves, goggles, appropriate clothing, or		
6.1.1	For workers except for those intervening in emergency cases - instructions in case of accidental spill and leak of substance or mixture:			
	a) use of appropriate protection (including personal protective equipment according to part 8 BL), in order to avoid any skin, eyes or personal			
	clothing contamination;			
	b) removing possible sources of ignition, providing proper ventilation, cor			
6.1.2	 c) emergency measures, for example necessary evacuation from danger For workers intervening in emergency cases - instructions for appropriate 			
6.2	Environmental precautions: Prevent environmental pollution - leakage interventer			
6.3	Methods and materials for limitation of leaks and for cleaning:	,, g. callender, c. coll		
6.3.1	Instructions for leak limitation of spilled substance or mixture			
	a) enclose the spilled mixture, cover the canalization;			
	b) seal the damaged package			
6.3.2	Instructions for removal of spilled substance or mixture			
	Absorb with appropriate agent, hand over to authorized person for dispos	sal.		
6.4	Reference to other sections: See also section 7., 8 and 13.			
7.	Section 7: Handling and storage			
7.1	Measures for safe manipulation:			
7.1.1	 Recomendations: a) Workers handeling the product have to get familiar with health and safety rules for work and have to obey these rules. Secure escape routs (enclosing of leaked mixture, sealing of demaged packages and so on), for fire prevention (remove ignition sources, non-sparkling tools and so on) andlimit the production of aerosol and dust. b) Obey measures for prevention of manipulation with incompatible substances or mixtures (see part 10) in common areas. c) Store in original closed packages in temperature from +5 to +25 °C, do not expose to temperature under 0 °C (not even in short term). Do not expose to direct sunlight or other heat sources. d) Prevent the contamination of environment, i.e. leak into canalization, surface or underground water and soil. Instructions for general hygiene of work: 			
7.1.2				
	a) Do not eat, drink or smoke on work areas.			
 b) After working with product wash your hands with soap and water, eventualy use regeneration hand cream. c) Before entering dining areas, remove contaminated clothing and protective equipment. 				
7.2	Conditions for safe storage of substances and mixtures including incomp	• •		
1.2	storages in original closed packages in temperatures from +5 to +25 °C,			
	not expose to direct sunlight or other heat sources. Prevent any contact	a

8.2	Exposure controls		
	Ensure adequate ventilation. Ensure protective equipment is worn while after thorough cleaning. Wash your hands and face with soap and water		
8.2.1 8.2.2	Appropriate engineering controls: Observe the usual precautions to protect the health and well-ventilated.		
0.2.2	Individual protection measures, such as personal protective equipment: Occupational exposure is governed by Directive 89/686/EEC therefore any use of personal protective equipment must be in accordance with this Regulation.		
	 a) Eyes and face protection: Suitable safety goggles (EN 166), face shiled. b) Skin protection: Common safety clothing with long sleave and shoes; take of the contaminated clothing and wash your skin with soap and 		
	water. b-1) Hands protection: suitable protective gloves (made from rubber - according to EN 374), wash your hands with soap and water after work,		
	c) Airways protection: with proper area ventilation not required. When spraying, face half-shiled is recomended for gass filtration (EN 405) or quarter-shiled with gass filter (EN 140, EN 141).		
	d) Heat hazard: Special attention must be paid to construction of personal protective measures, when specifying protective measures for protection against materials, which are considered to be heat hazard. Not relevant for this product.		
8.2.3	Environmental exposure controls: Avoid infiltration of surface and ground		
	Oraction & Diversion level 1 - 1 - 1		
9.	Section 9: Physical and chemical properties		
9.1.	Information on basic physical and chemical properties		
	a) State	low viscosity liquid	
	b) Color	white liquid	
	c) Odour:	characteristic	
1	Odor threshold:	Not specified	
1	d) Melting/Freezing point (temperature range) (°C):	Not specified	
1	e) Boiling point or initial boiling point and boiling range (°C)	approximately 100	
1	f) Combustibility:	non-flammable liquid	
1	g) Explosion limints: upper limit (% volume):	Not specified	
1	lower limit (% volume):	Not specified	
1	h) Point of ignition:	Not specified	
1	, · · · · · · · · · · · · · · · · · · ·		

4/15

1	i) Temperature of self-ignition:	Not specified	
	j) Temperature of decomposition (°C):	Not specified	
	k) pH (23 °C)	approximately 8 - 10 (Mixture A + B)	
	I) Kinematic viscosity:	Not specified	
	m) Solubility (23 °C)		
	- with water:	unlimited miscibility with water	
	- with fats:	Not specified	
		Not specified	
	n) Partition coefficient n - octanol/water:	Not specified	
	o) Steam pressure (20 °C):		
	 p) Density and/or relative density (20 °C): q) Relative viscosity of steam (at °C): 	approximately 1,1 g.cm ⁻³ Not specified	
	r) Particles characteristics:	Not specified	
9.2	Other information:		
9.2.1	Information about class of physical hazard:	not relevant	
9.2.2	Other safety characteristics		
	Evaporation rate:	Not specified	
	Dynamic viscosity:	Not specified	
	Explosive properties:	Not specified	
	Oxidizing properties:		
		Not specified	
	VOC (Mixture A + B)	83 g/L	
10.	Section 10: Stability and reactivity		
	Product is stable under recommended storage and handling conditions.		
10.1	Reactivity: Product is not reactive under recommended storage and ha	ndling conditions.	
10.2	Chemical stability: Product is stable under recommended storage and h	nandling conditions.	
10.3	Possibility of hazardous reactions: In case of contact with strong acids a	and bases, oxidizing agents and amines.	
10.4	Conditions to avoid: Temperatures below 0 °C and above 100 °C cause degradation of the product. Temperatures above recommended		
10.5	storage temperature reduce life of the product. Incompatible materials: Substances reacting with water, strong acids and bases, oxidizing agents, isocyanates, anhydrides, uncontrolled		
10.0	contact with amines.	des non ablanida and indafinable annonis usintuma usau fama dunian	
10.6	Hazardous Decomposition Products: Carbon monoxide and dioxide, hydrogen chloride and indefinable organic mixtures may form during burning.

11.1.6	Symptoms corresponding to physical, chemical and toxicological	no effects on human health are know	own	
11.1.7	features Belated and immediate effects and chronical effects of short/long term	no effects on human health are kno	own	
	exposure			
11.1.8	Interactive effects	unknown		
11.1.9	Lack of specific data	not relevant		
11.1.10	Mixtures	see part 8		
11.1.11	Mixtures information compared to substance information			
	1) Substances in the mixture can react with each other inside of a body and can cause different levels of absorption, metabolism and			
	2) It is necessary to consider, if concentration of each substance is sufficient to contribute mixture's effects on health. For each substance			
	a) if the information are doubled, they are listed only once for a substance as a whole, for example when two different substances are causing vomiting and diarrhea;	Not relevant for this mixture.		
	b) if it is not likely the effects will appear with current concentrations, for example when weak irritating substance is disolved in non-irritating solution to a level under certain concentration;	Not relevant for this mixture.		
	c) if the information about mutual effects of substances in the mixture are unavilable, no assumptions will be listed and instead effects on healtf of each substance will be listed.	see part 8		
11.1.12	Additional data:	None		
11.2	Other hazards information			
11.2.1	Features causing disruption of endocrinal systém	Not relevant for this mixture.		
11.2.2	Other information	None		
		None		
12.	Section 12: Ecological information			
12.1	Toxicity	Toxic to aquatic life with long lastin	a effects.	
	Acute toxicity for water organisms:	For the mixture is not known.	3	
		bisphenol-A + epichlorhydrin	bisphenol-F	
	- LC ₅₀ , 96 hours, fish (mg/kg):	3,1	1 - 10	
	- LC ₅₀ , 48 hours, fish (mg/kg):	1,4 - 1,7	1 - 10	
	- IC ₅₀ , 72 hours, algae (mg/kg):	1 - 10	1 - 10	
12.2	Persistence and degradability:	For the mixture is not known.		
		bisphenol-A + epichlorhydrin 12 % of epoxy resin decomposes	bisphenol-F not set	
		in 28 days		
12.3	Bioaccumulative potential:	For the mixture is not known.		
		bisphenol-A + epichlorhydrin	bisphenol-F	
		log Pow = 3 to 5	log Pow = 3,6	
12.4	Mobility in soil:	It was not determined, the blend is	miscible with water.	
12.5	Results of PBT and vPvB	The mixture does not meet the crite vPvB.	eria for classification as PBT or	
12.6	Features causing disruption of endocrinal systém	Unknown for this mixture		
12.7	Other adverse effects:	See Section 2		
	Additional data:	Details on the toxicity of hazardous	components are given below

13. Section 13: Disposal considerations

13.1 Methods of waste management:

a) Appropriate methods of substance, mixture and contaminated packaging disposal: Product remnants and packaging with product remnants must be incinerated in a hazardous waste incinerator or kept at a hazardous waste landfill.

	 b) Physical / chemical properties that can affect means of waste handling: Both A and B components are liquids that are freely mi water, after mixing and curing these behave as solid. c) Avoidance of disposal through sewer: It is necessary to prevent leakage of both components and hardened mixture into drains 			
	 c) Avoidance of disposal through sewer: It is necessary to prevent lead d) Special precautions for the recommended waste management: Avoidance 		hardened mixture into drains.	
14.	Section 14: Transport information			
14.1	UN number or ID number	UN3082		
	Required shipping label:			
	ADR/RID/ADN:	$\mathbf{\Phi}$		
	IMDG:		MARINE POLLUTANT EMS group: F-A,S-F	
	ICAO TI:			
14.2	Proper name of the United Nations for the shipment			
	ADR/RID/ADN:	ENVIRONMENTALLY HAZA	ARDOUS SUBSTANCE, LIQUID, N.O.S.	
			PHENOL A AND BISPHENOL F)	
	IMDG:		ARDOUS SUBSTANCE, LIQUID, N.O.S. PHENOL A AND BISPHENOL F)	
	ICAO TI:	ENVIRONMENTALLY HAZ	ARDOUS SUBSTANCE, LIQUID, N.O.S.	
		(EPOXY RESIN FROM BISI	PHENOL A AND BISPHENOL F)	
14.3	Class / classes of hazards to transportation:	0		
	ADR/RID/ADN:	9		
		9		
111		9		
14.4	Packing group: ADR/RID/ADN:	III		
	IMDG:			
	ICAO TI:			
14.5	Environmental hazards:		ported in containers by inland waterways	
14.5		This material presents a risk	k to the environment under the criteria of hazardous products and / or pollutants	
14.6	Special precautions for user:	See Section 8		
			ection 3.1.2.8 apply (ADR). Symbol (fish	
447	Special provisions (ADR):	and tree)		
14.7	Naval mass-transport according to instrumenst IMO:	Not applicable		
	Notes: Additional data:	None None		
15.	Section 15: Regulatory information			
15.1	Safety, health and environmental regulations/legislation specific for the substance or mixture. Regulation of the European Parliament and Council Regulation (EC) No 1907/2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals establishing a European Chemicals Agency, as amended Regulation of the European Parliament and Council Regulation (EC) No 1272/2008 (CLP) as amended			
	Commision directive (EU) No. 878/2020			
	EH40/2005 Workplace exposure limits (second edition, published 20 Control of Substances Hazardous to Health Regulations (as amended		ace exposure limits for use with the	
15.2	Assessment chemical safety of mixture:	Were not performed		
16.	Section 46: Other informations			
16.	Section 16: Other informations Information stated in this safety data sheet is based on the current kn safety as well as recommendation related to ecological matters that a			
	a) New edition.			
	b) key or legend for abbreviations and accronyms used in the safety of	data sheet:		
	LD ₅₀ The lethal dose for 50 % mortality of the test population re	elative to a control sample.		
	LC ₅₀ Lethal concentration for 50 % mortality of the test population relative to a control sample.			
	EC ₅₀ Effective concentration for 50 % mortality of the test population	lation relative to a control sample	e.	
	EC ₁₀ Effective concentration for 10 % mortality of the test popu	lation relative to a control sample	e.	
	IC ₅₀ Inhibitory concentration to reduce the growth or growth ra	te of 50% of the test population r	relative to a control sample.	
	LL ₅₀ Lethal loading doses of test substance resulting in 50% m	ortality		
	EL ₅₀ Effective loading doses of test substance resulting in 50%	mortality		
-	7/16	-	SUS 23/2022B	

PBT Persistent, bioaccumulative and toxic substances.

- vPvB Very persistent and very bioaccumulative substances.
- DNEL Derived No Effect Level derived concentration of the substance without adverse effects
- DMEL Derived Minimum Effect Level derived minimum level at which the adverse effects
- NOAEL No Observed Adverse Effect Level no negative effect was observed
- PNEC Predicted No Effect Concentration an estimate of the concentration of the substance without adverse effects
- NOELR No Observed Effect Loading Rate dosage rate without observed effect
- NOEC No Observed Effect Concentration concentration without observed effect
- NOEL No Observed Effect Level level without observed effect
- LOEC Lowest Observed Effect Concentration lowest concentrations with observable effects
- ADR European Agreement concerning the international carriage of dangerous goods by road.
- RID Regulations concerning the international carriage of dangerous goods by rail.
- IMDG International maritime code of dangerous goods.
- ICAO The International Civil Aviation Organization.
- IATA International Air Transport Association.
- GHS Globally Harmonized System of Classification and Labelling of Chemical substances.

c) important references to literature and data sources Initial data sources are safety data sheets of the inherent (components).

d) in case of mixture, statement about evaluation method used for classification according to article 9 of directive (ES) number 1272/2008 For evaluation purposes, principles of extrapolation were used. Calculation methods.

e) List of H-sentences, whose full form is not listed in other parts.

- H315 Causes skin irritation.
- H317 May cause an allergic skin reaction.
- H319 Causes serious eye irritation.
- H411 Toxic to aquatic life with long lasting effects.

Guidelines for training:

As required by national legislation.

Recommended restrictions on use (i. e. non-statutory recommendations by supplier):

Product should not be used for other purposes than specified (see section 1.2). Because specific conditions of use are beyond supplier's control it is responsibility of the user to adapt notifications to local law and regulations. Safety information describe the product with regard to safety and can not be considered technical information about the product.
