## SAFETY DATA SHEET according to regulation of Europian parliament and Council (ES) number 1907/2006 according Committee regulation (EU) number 878/2020 Date of Issue: 03. 02. 2022 Version number: 1 No. of pages: Revision date: Replaces version: SANATHERM LZH Product name: 1. Section 1: Identification of substance/mixture and of the company/undertaking 1.1 SANATHERM LZH Product identifier: The product is not a nanoform, nor does it contain any nanoforms. UFI code: 0442-QYG9-9F1W-7FPK 1.2 Relevant identified uses of the substance or mixture and uses advised against: 1.2.1 Relevant identified use: Lifecycle phases: PW (wide range of use by professionals - basic) C (consumer use) Usage Name: SU0 Other usage description: Adhesive and reinforcing material, for the SANATHERM thermal insulation system. Market description: PC1; PC15 Contributing Activity Name: Manual activities involving hand contact Contributing activities descriptor: PROC19 technical function of the product in Adhesive and reinforcing material, More information: this use: for the SANATHERM thermal insulation system. 0 - 10 t / yr quantity to be used: No Regulatory status by specific use: limited number of devices for this No use: the subsequent period of use 24 months relevant to this use: ERC2; ERC8c; ERC8f; ERC10a; an overview of environmental release categories for each life ERC11a cycle stage: supplied as a mixture 1.2.2 Uses advised against: all other uses 1.3 Details about the supplier of the safety data sheet: Producer and supplier: AUSTIS a. s. K Austisu 680, 154 00 PRAHA 5 - Slivenec Adress: Telephone number: +420 251 099 111 Fax: +420 251 099 112 austis@austis.cz e-mail 1.4 +420 725 491 378 Emergency telephone number: +420 251 099 247 Centre of the Toxicologicaly information Na Bojišti 1, 120 00 Prague 2, Tel.: +420 224 919 293 C7 Section 2: Hazard identification 2.

2.1 Classification of the substance or mixture Eye Dam. 1; H318 Classification under Regulation 1272/2008/EU STOT SE 3; H335 Skin Irrit. 2; H315 Skin Sens. 1; H317 2.2 Label elements GHS05 GHS07 Symbols: Signal word: Dangerous It contains a hazardous substance: clinker Hazard Statement:

The mixture is classified as dangerous.

Cement (Portland) clinker, dust from the production of Portland

H318: Causes serious eye damage.

H335: May cause respiratory irritation.

H315: Causes skin irritation.

H317: May cause an allergic skin reaction.

	Precautionary Statement:	protection. P305+P351+P338: IF IN EYES several minutes. Remove contr Continue rinsing. P310: Immediately call a POIS P302+P352: IF ON SKIN: Was P332+P313: If skin irritation oc P501: Dispose of contents/con	protective clothing/eye protection/ face 5: Rinse cautiously with water for act lenses, if present and easy to do.	
2.3	Other hazards:		eria to be classified as PBT or vPvB endocrine disruptor, nor does it	
	Other risks:	unknown		
3.	Section 3: Composition / information on ingredients			
0.0	Mixture of cement, graded quartz sand and refining chemicals.			
3.2	Mixtures Chemical name:	Silion	Doutland compat	
	Content [%]:	Silica 50	Portland cement 20 - 50	
	Index number:	Not Assigned	20 - 50 Not Assigned	
	CAS:	14808-60-7	65997-15-1	
	EC number (EINECS):	238-878-4	266-043-4	
	REACH Registration number:	Not Assigned	Not Assigned	
	Classification according to Directive 1272/2008/EU:	not Assigned	Eye Dam. 1; H318 STOT SE 3; H335 Skin Irrit. 2; H315 Skin Sens. 1; H317	
	Specific concentration limits, M-factors:	Not Assigned	Not Assigned	
		Established Exposure limit EH40/2005 (WELs):	Established Exposure limit EH40/2005 (WELs):	
	Full text of H - phrases in Section 16			
4.	Section 4: First aid measures			
4.1	<ul> <li>Description of first aid measures</li> <li>When providing first aid it is necessary to ensure safety of both victim and person rescuing. It is necessary to avoid chaotic behavior. Victim must be kept in mental and physical rest. Victim must be kept warm and must not get cold. Take original container with label or safety data sheet with information about substance or mixture with you in case of medical examination.</li> <li>Inhalation: Break exposure, move to fresh air and protect the victim from cold. Provide medical treatment especially if coughing, shortness of breath or other symptoms persist.</li> <li>When on skin: Put away contaminated clothes and shoes, wash the contaminated spot with plenty of tepid water; if the skin is not irritated, soap can be used; seek doctor's advice, especially if the skin stays irritated.</li> <li>Eye Contact: Rinse eyes with plenty of water (10 to 15 minutes). Keep your eyes opened (even by force if necessary). If the victim is wearing contact lenses remove them immediately. Seek medical attention.</li> <li>Ingestion: Do not induce vomiting! Drink at least 0,5 liters of water with 5 to 10 tablets of crushed charcoal. In case of nausea contact the Toxicology Information Centre for need of medical treatment with information about composition of the mixture from the original container or SDS.</li> </ul>			
4.2	Most important symptoms and effects, both acute and delayed			
	The product may have adverse effects through inhalation and if sw	allowed. It can irritate skin, mucous m	embranes and eyes.	
4.3	Indication of any immediate medical attention and special treatmer	nt needed:	Symptomatic treatment	
5.	Section 5: Fire-fighting measures			
5.1	Extinguishing media			
	Suitable extinguishing media: not relevant			
	Unsuitable extinguishing media: not relevant			
5.2	Special hazards arising from the substance or mixture: none			
5.3	Advice for firefighters: none			
6.	Section 6: Accidental release measures			
6.1	Personal precautions, protective equipment and emergency proceed respirator.	dures: Appropriate protective gloves, g	goggles, appropriate clothing, or	
6.1.1	For workers except for those intervening in emergency cases - inst a) use of appropriate protection (including personal protective equi clothing contamination;			

6.1.2 6.2 6.3 6.3.1 6.3.2 6.4	<ul> <li>b) removing possible sources of ignition, providing proper version of the second sec</li></ul>	from dangerous area or consultation with an expe or appropriate materials of personal protective suit - leakage into drains, surface water, groundwater g: e	s (see part 8 BL)
7.	Section 7: Handling and storage		
7.1	Measures for safe manipulation:		
7.1.1	<ul> <li>Recomendations:</li> <li>a) Workers handeling the product have to get familiar with h (enclosing of leaked mixture, sealing of demaged packages on) andlimit the production of aerosol and dust.</li> <li>b) Obey measures for prevention of manipulation with incon c) Store in original closed packages in temperature from +5</li> </ul>	and so on), for fire prevention (remove ignition so	urces, non-sparkling tools and so ommon areas.
	not expose to direct sunlight or other heat sources. d) Prevent the contamination of environment, i.e. leak into c	analization surface or underground water and so	1
7.1.2	Instructions for general hygiene of work:	and zation, surface of underground water and sol	
	a) Do not eat, drink or smoke on work areas.		
	b) After working with product wash your hands with soap an	d water, eventualy use regeneration hand cream.	
	c) Before entering dining areas, remove contaminated cloth	ing and protective equipment.	
7.2	onditions for safe storage of substances and mixtures including incompatible substances and mixtures: Store in dry and well-ventilated orages in original closed packages in temperatures from +5 to +25 °C, do not expose to temperature under 0 °C (not even in short term). Do ot expose to direct sunlight or other heat sources. Prevent any contact with oxidazing substances, strong acids and bases. Do not store with od, drinks and feed. The product is not a flamable liquid according to ČSN 65 0201.		
7.3	Specific end use: see part 1.2; coating procedure and recondocumentation.	nendations are listed in technical list of the produc	t, or in other product
8.	Section 8: Exposure controls / personal protection

d) in case of mixture, statement about evaluation method used for classification according to article 9 of directive (ES) number 1272/2008 For evaluation purposes, principles of extrapolation were used. Calculation methods.

H315	Causes skin irritation.
H317	May cause an allergic skin reaction.

H318 Causes serious eye damage.

H335 May cause respiratory irritation.

Guidelines for training:

As required by national legislation.

Recommended restrictions on use (i. e. non-statutory recommendations by supplier):

Product should not be used for other purposes than specified (see section 1.2). Because specific conditions of use are beyond supplier's control, it is the responsibility of the user to adapt all the mentioned information to local law and regulations. Safety information describe the product with regard to safety and cannot be considered technical information about the product.
