4.	Section 4: First aid measures		
4.1 4.2 4.3 5.	Description of first aid measures When providing first aid it is necessary to ensure safety of both victim and must be kept in mental and physical rest. Victim must be kept warm and sheet with information about substance or mixture with you in case of me Inhalation: Break exposure, move to fresh air protecting the victim from co- breath or other symptoms persist. When on skin: Put away contaminated clothes and shoes, wash the conta- can be used; seek doctor's advice, especially if the skin stays irritated. Eye Contact: Rinse eyes with plenty of water (10 to 15 min). Keep eyes of lenses remove them immediately. Seek medical attention. Ingestion: Do not induce vomiting! Drink at least 0.5 liters of water with 5 Toxicology Information Centre for need of medical treatment with informal SDS. Most important symptoms and effects, both acute and delayed The product may have adverse effects through inhalation and if swallowe Indication of any immediate medical attention and special treatment need <b>Section 5: Fire-fighting measures</b>	must not get chilled. Take original co dical examination. old. Provide medical treatment espe aminated spot with plenty of tepid w pen (even by force if necessary). If to 10 tablets of crushed charcoal. In tion about composition of the mixtur d. It can irritate skin, mucous memb	ontainer with label or safety data acially if coughing, shortness of ater; if the skin is not irritated, soap the victim is wearing contact a case of nausea contact the re from the original container or
5.1	Extinguishing media		
	Suitable extinguishing media: The product is not inflammable. Water spra	ay (water mist), foam, carbon dioxide	e, dry powder.
	Unsuitable extinguishing media: The strong water current. It can be sprea		
5.2	Specific danger linked to the substance or mixture: Carbon monoxide and		roduced while burning.
5.3	Advice for firefighters: wear a breathing apparatus and protective clothing	Ι.	
6.	Section 6: Accidental release measures		
6.1	Personal precautions, protective equipment and emergency procedures: respirator.		
6.1.1	For workers except for those intervening in emergency cases - instruction a) use of appropriate protection (including personal protective equipment clothing contamination;	•	
	b) removing possible sources of ignition, providing proper ventilation, con		
<b>•</b> • -	c) emergency measures, for example necessary evacuation from danger		
6.1.2 6.2	For workers intervening in emergency cases - instructions for appropriate Environmental precautions: Prevent environmental pollution - leakage intervented pol		
6.3	Methods and materials for limitation of leaks and for cleaning:		
6.3.1	Instructions for leak limitation of spilled substance or mixture		

a) enclose the spilled mixture, cover the canalization;

b) seal the damaged package

- 6.3.2 Instructions for removal of spilled substance or mixture
- Absorb with appropriate agent, hand over to authorized person for disposal.
- 6.4 Reference to other sections: See also section 7., 8 and 13.

## 7. Section 7: Handling and storage

7.1 Measures for safe manipulation:

7.1.1 Recomendations:

a) Workers handeling the product have to get familiar with health and safety rules for work and have to obey these rules. Secure escape routs (enclosing of leaked mixture, sealing of demaged packages and so on), for fire prevention (remove ignition sources, non-sparkling tools and so on) and limit the production of aerosol and dust.

b) Obey measures for prevention of manipulation with incompatible substances or mixtures (see part 10) in common areas.

c) Store in original closed packages in temperature from +5 to +25 °C, do not expose to temperature under 0 °C (not even in short term). Do not expose to direct sunlight or other heat sources.

d) Prevent the contamination of environment, i.e. leak into canalization, surface or underground water and soil.

7.1.2 Instructions for general hygiene of work:

a) Do not eat, drink or smoke on work areas.

- b) After working with product wash your hands with soap and water, eventualy use regeneration hand cream.
- c) Before entering dining areas, remove contaminated clothing and protective equipment.
- 7.2 Conditions for safe storage of substances and mixtures including incompatible substances and mixtures: Store in dry and well-ventilated storages in original closed packages in temperatures from +5 to +25 °C, do not expose to temperature under 0 °C (not even in short term). Do not expose to direct sunlight or other heat sources. Prevent any contact with oxidazing substances, strong acids and bases. Do not store with food, drinks and feed. The product is not a flamable liquid according to ČSN 65 0201.
- 7.3 Specific end use: see part 1.2; coating procedure and recomendations are listed in technical list of the product, or in other product documentation

## 81 Control parameters:

Exposure limits EH40/2005 (WELs):

Not Assigned

8.2 Exposure controls

8.

Ensure adequate ventilation. Ensure protective equipment is worn while working with the product. Contaminated work clothes can be reused after thorough cleaning. Wash your hands and face with soap and water after use. Do not eat, drink or smoke while working with the product.

- 8.2.1 Appropriate engineering controls: Observe the usual precautions to protect the health and well-ventilated.
- 8.2.2 Individual protection measures, such as personal protective equipment:

Section 8: Exposure controls / personal protection

Occupational exposure is governed by Directive 89/686/EEC therefore any use of personal protective equipment must be in accordance with this Regulation.

a) Eyes and face protection: Suitable safety goggles (EN 166), face shiled.

b) Skin protection: Common safety clothing with long sleave and shoes; take of the contaminated clothing and wash your skin with soap and water.

b-1) Hands protection: suitable protective gloves (made from rubber - according to EN 374), wash your hands with soap and water after work, c) Airways protection: with proper area ventilation not required. When spraying, face half-shiled is recomended for gass filtration (EN 405) or quarter-shiled with gass filter (EN 140, EN 141).

d) Heat hazard: Special attention must be paid to construction of personal protective measures, when specifying protective measures for protection against materials, which are considered to be heat hazard. Not relevant for this product.

8.2.3 Environmental exposure controls: Avoid infiltration of surface and groundwater and soil.

## Section 9: Physical and chemical properties

9 9.1. Information on basic physical and chemical properties a) State b) Color c) Odour: Odor threshold. d) Melting/Freezing point (temperature range) (°C): e) Boiling point or initial boiling point and boiling range (°C) f) Combustibility: g) Explosion limints: upper limit (% volume): lower limit (% volume): h) Point of ignition:

i) Temperature of self-ignition:

- j) Temperature of decomposition (°C):
- k) pH (23 °C)

I) Kinematic viscosity:

- m) Solubility (23 °C)
- with water:

viscous liquid color shown on the cover characteristic Not specified approximately 0 approximately 100 non-flammable liquid Not specified Not specified Not specified Not specified Not specified 8,0 - 9,0 Not specified

unlimited miscibility

	- with fats:	Not specified
	n) Partition coefficient n - octanol/water:	Not specified
	o) Steam pressure (20 °C):	2,3 kPa
	p) Density and/or relative density (20 °C):	approximately 1,55 g.cm <sup>-3</sup>
	q) Relative viscosity of steam (at °C):	Not specified
	r) Particles characteristics:	Not specified
9.2	Other information:	
9.2.1	Information about class of physical hazard:	is not relevant
9.2.2	Other safety characteristics	
	Evaporation rate:	Not specified
	Dynamic viscosity:	Not specified
	Explosive properties:	Not specified
	Oxidizing properties:	Not specified
	VOC (g/L):	6
	TOC (kg/kg)	0,0023
		0,0020
10.	Section 10: Stability and reactivity	
	Product is stable under recommended storage and handling conditions.	
10.1	Reactivity: Product is not reactive under recommended storage and hand	ling conditions.
10.2	Chemical stability: Product is stable under recommended storage and har	ndling conditions.
10.3	Possibility of hazardous reactions: In case of contact with substances rea	cting dangerously with water.
10.4	Conditions to avoid: Temperatures below 0 °C and above 100 °C cause d	egradation of the product. Temperatures above recommended storage
	temperature reduce life of the product.	
10.5	Incompatible materials: Substances reacting with water.	
10.6	Hazardous Decomposition Products: Carbon monoxide and dioxide and c	arbon black may form during burning.
11.	Section 11: Toxicological information	
11.1	Information about hazard classes acording to (ES) č. 1272/2008	
	a) acute toxicity:	the classification cirteria are not met based on avilable information
	- LD <sub>50</sub> , oral, rat (mg.kg <sup>-1</sup> ):	the classification cirteria are not met based on avilable information
	- LD <sub>50</sub> , dermal, rat or rabbit (mg.kg <sup>-1</sup> ):	the classification cirteria are not met based on avilable information
	- LC <sub>50</sub> , inhalation, rat, for aerosols or particles (mg.kg <sup>-1</sup> ):	the classification cirteria are not met based on avilable information
	<ul> <li>LC<sub>50</sub>, inhalation, rat, for gases and vapours (mg.kg<sup>-1</sup>):</li> </ul>	the classification cirteria are not met based on avilable information
	b) corrosivity/skin irritation:	the classification cirteria are not met based on avilable information
	c) serious eye damage / eyes irritation:	the classification cirteria are not met based on avilable information
	d) sensitivity of airways / sensitivity of skin:	the classification cirteria are not met based on avilable information
	e) germ cells mutagenicity:	the classification cirteria are not met based on avilable information
	f) carcinogenicity:	the classification cirteria are not met based on avilable information
	g) toxicity for reproduction:	the classification cirteria are not met based on avilable information
	h) toxicity for specific organs - single exposure:	the classification cirteria are not met based on avilable information
	i) toxicity for specific organs - multiple exposures:	the classification cirteria are not met based on avilable information
	j) hazards while inhaled:	the classification cirteria are not met based on avilable information
	Human experience:	No detrimental effects were found upon compliance with the
		prescribed safety measures.
	Tests on animals:	Were not performed
	Information for each hazard class or breakdown:	see above
11.1.2	Toxicological properties of mixture	not avilable
11 1 3	If enough information from substance/mixture trials exist, it might be	not relevant
	necessary to sum up results of used studies, for example according to	
	exposure run	
11.1.4	If the classification criteria are not met for specific hazard class,	relevant concentration limits were not exceeded
	information explaining the justification should be stated.	na affaata an kuman kaalili an laraan
	Information about likely exposure run	no effects on human health are known
11.1.6	Symptoms corresponding to physical, chemical and toxicological features	no effects on numan health are known
11.1.7	Belated and immediate effects and chronical effects of short/long term	no effects on human health are known
14.4.5	exposure	
	Interactive effects	unknown
	Lack of specific data	not relevant
	Mixtures	see part 8
11.1.1 <sup>-1</sup>	Mixtures information compared to substance information	
1	The substances in the mixture can react with each other inside of a body ar	nd can cause different levels of absorption, metabolism and secretion.

1) Substances in the mixture can react with each other inside of a body and can cause different levels of absorption, metabolism and secretion. 2) It is necessary to consider, if concentration of each substance is sufficient to contribute mixture's effects on health. For each substance

	a) if the information are doubled, they are listed only once for a substance as a whole, for example when two different substances are causing vomiting and diarrhea;	Not relevant for this mixture.
	b) if it is not likely the effects will appear with current concentrations, for example when weak irritating substance is disolved in non-irritating solution to a level under certain concentration;	Not relevant for this mixture.
	c) if the information about mutual effects of substances in the mixture are unavilable, no assumptions will be listed and instead effects on healtf of each substance will be listed.	see part 8
11.1.1	2 Other information	None
11.2	Other hazards information	
11.2.1	Features causing disruption of endocrinal systém	Not relevant for this mixture.
11.2.2	Additional data:	None
12.	Section 12: Ecological information	
12.1	Toxicity	
	Acute toxicity for water organisms:	
	- LC <sub>50</sub> , 96 hours, fish (mg/kg):	Not set
	- LC <sub>50</sub> , 48 hours, fish (mg/kg):	Not set
	- IC <sub>50</sub> , 72 hours, algae (mg/kg):	
10.0		Not set
12.2	Persistence and degradability:	Not set
12.3	Bioaccumulative potential:	Not set
12.4	Mobility in soil:	It was not determined, the blend is miscible with water.
12.5	Results of PBT and vPvB	The mixture does not meet the criteria for classification as PBT or vPvB.
12.6	Features causing disruption of endocrinal systém	Unknown for this mixture
12.7	Other adverse effects:	See Section 2
	Additional data:	The product must not leak to surface and groundwater. Notify competent authorities immediately in case of accident.
13.	Section 13: Disposal considerations	
<b>13.</b> 13.1	Methods of waste management: a) Appropriate methods of substance, mixture and contaminated packagin	
	Methods of waste management:	us waste landfill. : Liquid mixture is completely miscible with water. e of both components and hardened mixture into drains.
13.1 <b>14</b> .	Methods of waste management: a) Appropriate methods of substance, mixture and contaminated packagin must be incinerated in a hazardous waste incinerator or kept at a hazardous b) Physical / chemical properties that can affect means of waste handling c) Avoidance of disposal through sewer: It is necessary to prevent leakage d) Special precautions for the recommended waste management: Avoid of Section 14: Transport information	us waste landfill. : Liquid mixture is completely miscible with water. e of both components and hardened mixture into drains. contact with skin and eyes.
	Methods of waste management: a) Appropriate methods of substance, mixture and contaminated packagin must be incinerated in a hazardous waste incinerator or kept at a hazardous b) Physical / chemical properties that can affect means of waste handling c) Avoidance of disposal through sewer: It is necessary to prevent leakaged d) Special precautions for the recommended waste management: Avoid of Section 14: Transport information UN number or ID number	us waste landfill. : Liquid mixture is completely miscible with water. e of both components and hardened mixture into drains.
13.1 <b>14</b> . Sa	Safety, health and environmental regulations/legislation specific for the substance or mixture.					
	Regulation of the European Parliament and Council Regulation (EC) No 1907/2006 concerning the Registration, Evaluation, Authorisation and					
Re	Restriction of Chemicals establishing a European Chemicals Agency, as amended					
Re	Regulation of the European Parliament and Council Regulation (EC) No 1272/2008 (CLP) as amended					
Co	Commision directive (EU) No. 878/2020					
	EH40/2005 Workplace exposure limits (second edition, published 2011). Containing the list of workplace exposure limits for use with the Control of Substances Hazardous to Health Regulations (as amended)					
As	ssessme	ent chemical safety of mixture: Were not performed				
Se	Section 16: Other informations					
	Information stated in this safety data sheet is based on the current knowledge of EU legislation. It is recommendation in terms of health and safety as well as recommendation related to ecological matters that are essential to safe usage of the product.					
a)	a) New edition.					
b)	key or l	egend for abbreviations and accronyms used in the safety data sheet:				
LD	D <sub>50</sub>	The lethal dose for 50 % mortality of the test population relative to a control sample.				
LC	C <sub>50</sub>	Lethal concentration for 50 % mortality of the test population relative to a control sample.				
EC	C <sub>50</sub>	Effective concentration for 50 % mortality of the test population relative to a control sample.				
EC	C <sub>10</sub>	Effective concentration for 10 % mortality of the test population relative to a control sample.				
IC	50	Inhibitory concentration to reduce the growth or growth rate of 50% of the test population relative to a control sample.				
LL		Lethal loading doses of test substance resulting in 50% mortality				
EL		Effective loading doses of test substance resulting in 50% mortality				
PB		Persistent, bioaccumulative and toxic substances.				
	РvВ	Very persistent and very bioaccumulative substances.				
	NEL	Derived No Effect Level - derived concentration of the substance without adverse effects				
	MEL	Derived Minimum Effect Level - derived minimum level at which the adverse effects				
	OAEL	No Observed Adverse Effect Level - no negative effect was observed				
	NEC	Predicted No Effect Concentration - an estimate of the concentration of the substance without adverse effects				
	OELR	No Observed Effect Loading Rate - dosage rate without observed effect				
	OEC	No Observed Effect Concentration - concentration without observed effect				
	OEL	No Observed Effect Level - level without observed effect				
	DEC	Lowest Observed Effect Concentration - lowest concentrations with observable effects				
AD		European Agreement concerning the international carriage of dangerous goods by road.				
RII	ID	Regulations concerning the international carriage of dangerous goods by rail.				
IM	1DG	International maritime code of dangerous goods.				
IC/	AO	The International Civil Aviation Organization.				
IA	TA	International Air Transport Association.				
GH	HS	Globally Harmonized System of Classification and Labelling of Chemical substances.				
,	c) important references to literature and data sources					
Init	Initial data sources are safety data sheets of the inherent (components).					
d)	d) in case of mixture, statement about evaluation method used for classification according to article 9 of directive (ES) number 1272/2008					
Fo	For evaluation purposes, principles of extrapolation were used. Calculation methods.					
e)	List of H	H-sentences, whose full form is not listed in other parts.				
H3	301	Toxic if swallowed.				
H3	310	Fatal in contact with skin.				
H3	314	Causes severe skin burns and eye damage.				
H3	315	Causes skin irritation.				
	317	May cause an allergic skin reaction.				
	318	Causes serious eye damage.				
	319	Causes serious eye irritation.				
	330	Fatal if inhaled.				
	400	Very toxic to aquatic life.				

- H400 Very toxic to aquatic life.
- H410 Very toxic to aquatic life with long lasting effects.
- EUH071 Causes burns to the respiratory tract.

Guidelines for training: As required by national legislation.

Recommended restrictions on use (i. e. non-statutory recommendations by supplier):

Product should not be used for other purposes than specified (see section 1.2). Because specific conditions of use are beyond supplier's control it is responsibility of the user to adapt notifications to local law and regulations. Safety information describe the product with regard to safety and can not be considered technical information about the product.
